Allowable Subject Matter

Claims 71-80 and 83 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 71 and 77, the prior art fails to teach a ureteral stent that includes, among all the limitations, a first loop and a second loop being constructed of substantially the same material as a distal region of a tubular body or extending monolithically from the distal region where the loops are configured to be positioned in a bladder of a patient in combination with an axis of the first loop and an axis of the second loop not intersecting within an area defined by an opening at the proximal end of the distal region.

Regarding claim 83, the prior art fails to teach a ureteral stent that includes, among all the limitations, a first loop and a second loop where a first portion and a second portion of the first loop extend from between first and second portions of a perimeter of an opening at a proximal end of a distal region of a tubular body where the first and second portions are different and where a first portion and a second portion of the second loop each extend from the first portion of the perimeter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
